Day 09

Date & Time Formulae

If you use formula for Date & it updated in daily basis

If you use shortcut key it is not updated in daily basis

	Shortcutkey	formula
Current Date =	Ctrl;	today()
Current Time =	Ctrl+Shift+;, Ctrl+:	Now()

Custom format

=Text (today(), "mm-dd-yyyy") => 10-18-2026

=Text (Now(), "h:mm AM/PM") => 4:33 PM

10-18-2026

Month. Day Year

Date

=> MM-DD-YYYY

14:10:25 AM

Hour Minute Second AM/PM

TIME

B6 = 14-05-2012

=> Text = TEXT(B6, "ddd") => Mon

=> TEXT(A1, "AM/PM") => AM

=TEXT(TIME(C33, D33, E33), "hh:mm:ss AM/PM")

5.10.04 PM

NetWorkDays => Difference b/w 2 date (Assumption - (Excluding saturday, Sunday)

C23 : 10-04-2026 D33 : 15-04-2026

Days => Difference = Days(C33, D33) -> 5

NetworkDays(C33, D33) -> Holidays exclude (Bahir)
↓ only saturday & sunday

Holidays Mention

NetworkDays(C33, D33, $A$54:$A$55)

It also exclude Holidays date & Weekend
↓ ↓
custom Sat Sun

NetworkDays.INTL
↓
only custom Dates count Weekend

you have custom
1 off
0 ON

custom Weekend
↓

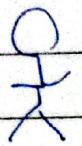

= NetworkDay.INTL(B54, C54, "1010000", $A$54:$A$55)
↓
Holidays

Days 360 => All mon-ths - 30 Days
0 -> US Method 1 -> European Method

DATE _____ DAY M T W T F S S

Calculation of last Working Day (Excluding sat, sun)

Work day -> Weekend not include

-> Resign (30 days notice) -> 10/4/2026 + 30 days =>
10/5/2026 -> Party

-> 10/4/206 + 30 working days -> .... Workday

Customize weekend - Workday.intl
customize

28-10-2026 o7 10-11-2026
↓ ↓
start yahi say honga last day

Network days

Start date aur end date kay beech kay working days

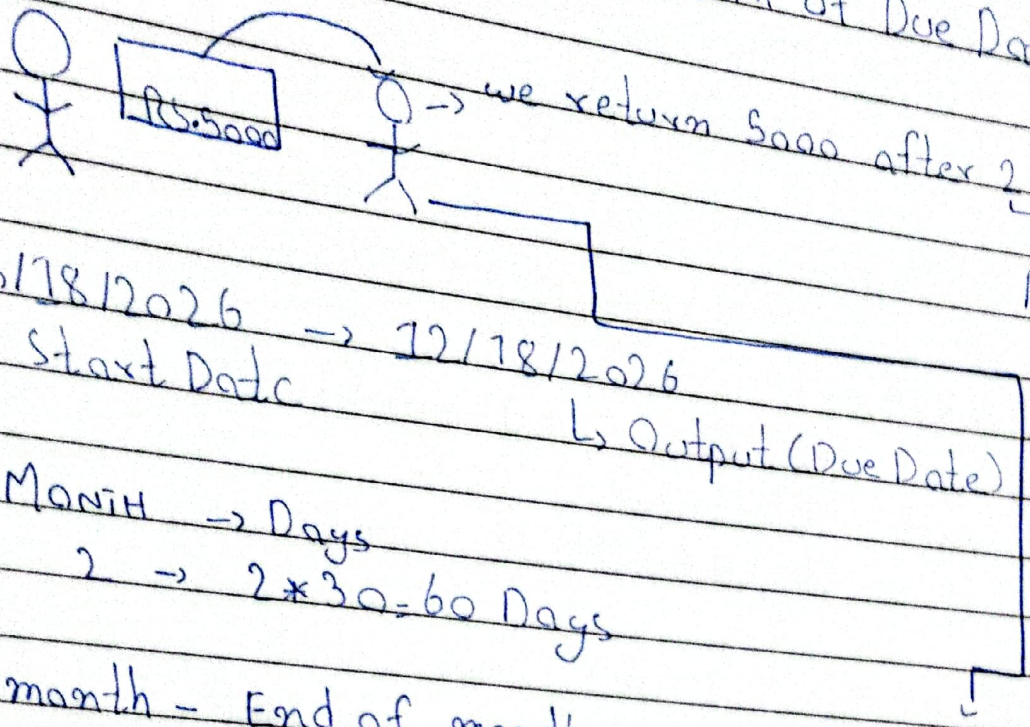

Work day

Target date nikalta future yah past kay basis par.

Start date + Add day -> working date find
Holiday deta.
Ex: deadline, target date, Resign)

DAY M T W T F S S

Edate -> End Date (calculation of Due Date)

10/18/2026 -> 12/18/2026
Start Date -> Output (Due Date)

MONTH -> Days
2 -> 2*30 = 60 Days

Eomonth - End of month

If I applied 0 in month than answer will be the last date of month

If this say we return money on due date month not due date. It is last date of month

12/31/2026

It is used in tracker

B33 - 10/18/2026 -> =Eomonth(B33, 0) -> 10/31/2026

=> Dated if

DoB	Today	Age
A1 - 04-11-2004	B1 - 18-10-2026	= datedif(A1, B1, "Y") = 21

=> Year fraction

21.4555 -> In fraction

DAY M T W T F S S

DATE

=> WeekDay
