formula
- Number → Directly
- Cell → Directly
- Text, character → " "

Example

A1 - Oneeb B1 - Arif

Answer → Oneeb Arif

- Concatenate → dont space apply b/w two text so solution is

= Concatenate (Oneeb, " ", Arif)

concat also same

Both are using two text are joined it but there are no space between so we use " "

Delimeter / Seperator (-)

Oneeb-Arif

Seperator It can joined it between two text and - is a seperation

Combined or joined Text using seperator (-) character, space, " ", That is Delimeter

Text Join

Delimeter

= Text Join (" ", True, Text1, Text2)

True or false mean if cell are empty and you say True and you have not Middle Name and cell are empty so empty cell are ignore if false so it can apply space
