DAY 11 | EXCEL

My Data Analyst Journey

SUMIF, COUNTIF & Attendance Tracker

Day 11 of learning Excel in public.

SUM IF F4

Swipe to learn with me >

SUMIF: The Idea

SUM + IF

What It Does

Adds up a range, but only the values that match one condition.

Example

Sales sheet with 100 rows and 10 parties. You want the total sale of Mr. X.

Why Not Filter?

Filter is fine for a few parties. With 100 parties it is slow.

Why SUMIF

In B2B, parties buy in chunks again and again. SUMIF totals them instantly.

SUMIF Syntax

=SUMIF(range, criteria, sum_range)

Range

Where to search. The Party Name column in your Master Data.

Criteria

What to find. The party name in your Reporting table (Mr. X).

Sum Range

Which values to add. The Amount column in Master Data.

Two Tables

Master Data holds all rows. Reporting shows one line per party.

Build SUMIF Step by Step

Master Data to Reporting

Step 1

Type =SUMIF(in the Reporting cell.

Step 2

Select all party names in Master Data and press F4 to lock them. Type a comma.

Step 3

Click the party name in Reporting (do not lock it). Type a comma.

Step 4

Select all sales amounts, press F4, close the bracket and press Enter.

Why F4? The ranges must stay fixed when you drag the formula down. The criteria cell must move to the next party.

SUMIF Examples

Copy the pattern

`=SUMIF(B:B,F2,C:C)`	**Total sale of party F2**
`=SUMIF(C:C,">50000")`	**Sales above 50,000**
`=SUMIF(B:B,"Mr*",C:C)`	**Names starting with Mr**
`=SUMIF(C:C,">"&F1)`	**Above the value in F1**

If sum_range is left out, SUMIF adds the range you searched. Operators go inside quotes. Use & to join an operator with a cell.

AVERAGEIF & COUNTIF

Same pattern, different result

`=AVERAGEIF(B:B,F2,C:C)`	**Average sale of F2**
`=COUNTIF(B:B,F2)`	**Times party F2 came**
`=COUNTIF(C:C,">50000")`	**Sales above 50,000**
`=COUNTIF(B:B,"Mr*")`	**Names starting with Mr**

AVERAGEIF is written exactly like SUMIF. COUNTIF needs only two parts: =COUNTIF(range, criteria).

Criteria Tricks

What you can type as criteria

`"Mr. X"`	Exact text
`">50000"`	Greater than
`"<>Paid"`	Not equal to
`"Mr*"`	Starts with Mr
`"*Khan"`	Ends with Khan
`"?at"`	One letter + at

** means any number of characters and ? means exactly one. Matching is not case-sensitive.*

The S Versions

Many conditions at once

`=SUMIFS(C:C,B:B,F2,D:D,"East")`	**Sum, 2 rules**
`=COUNTIFS(B:B,F2,D:D,"East")`	**Count, 2 rules**
`=AVERAGEIFS(C:C,B:B,F2,D:D,"East")`	**Average, 2 rules**
`=MAXIFS(C:C,B:B,F2)`	**Biggest for party F2**
`=MINIFS(C:C,B:B,F2)`	**Smallest for party F2**

In SUMIFS the sum range comes FIRST. MAXIFS and MINIFS need Excel 2019 or newer.

Attendance Tracker

Two ways to build it

Method 1

Checkboxes (Microsoft 365). Ticked = TRUE, unticked = FALSE.

Method 2

Symbols with the Wingdings 2 font. P shows a check mark and O shows an X.

The Counting

COUNTIF counts Present and Absent across Monday to Friday.

Method 1: Checkboxes

Microsoft 365

Step 1

Select the cells for Monday to Friday.

Step 2

Insert a checkbox: Insert tab > Checkbox.

Present

=COUNTIF(B2:F2,TRUE) counts ticked boxes. Drag it down.

Absent

=COUNTIF(B2:F2,FALSE) counts unticked boxes.

Tip: select a checkbox cell and press Space to tick or untick it.

Method 2: Symbols

Works in every Excel version

Step 1

Select the cells > Home > Font > Wingdings 2.

Step 2

Type capital P for a check mark and capital O for an X.

Present

=COUNTIF(B2:F2,"P")

Absent

=COUNTIF(B2:F2,"O")

The cell still holds the letter P or O. Only the font makes it look like a symbol.

Attendance Extras

Make it smarter

Attendance %

=COUNTIF(B2:F2,TRUE)/COLUMNS(B2:F2), then format as %.

Daily Total

=COUNTIF(B2:B20,TRUE) shows how many were present on Monday.

Highlight Absent

Conditional Formatting > Highlight Cells Rules > Equal To > FALSE.

Flag Low Attendance

=IF(H2>=75%,"OK","Short") marks students below 75%.

DAY 11 | EXCEL

Day 11 Shortcuts

Build reports faster

Lock a range ($)	F4
Select column data	Ctrl + Shift + Down
Select whole column	Ctrl + Space
Tick / untick a checkbox	Space
Fill formula down	Ctrl + D
Function Arguments box	Ctrl + A
Accept function name	Tab
Make an Excel Table	Ctrl + T

Day 11 Cheat Sheet

All functions in one place

Conditional Total

SUMIF, SUMIFS

Conditional Average

AVERAGEIF, AVERAGEIFS

Conditional Count

COUNTIF, COUNTIFS

Conditional Min / Max

MINIFS, MAXIFS

Attendance

Checkbox TRUE / FALSE, or Wingdings 2 with P and O

Day 11
Done!

SUMIF, COUNTIF, AVERAGEIF
and an attendance tracker.

Can you total sales for one party?
Tell me in the comments.

Follow for Day 12
