Day 3

Clipboard → Copy ..... Sheet1 ✓ ----> Sheet2 ✓ Ctrl+C

Cut ..... ✓ Ctrl+X

Paste ..... pasting Ctrl+V

Paste Special ---> Special cases for pasting → Ctrl+alt+V

Move data to another place

Ctrl+A or select → Ctrl+C → Ctrl+X → Ctrl+V

Ctrl+X: Remove old destination

Ctrl+V: destination

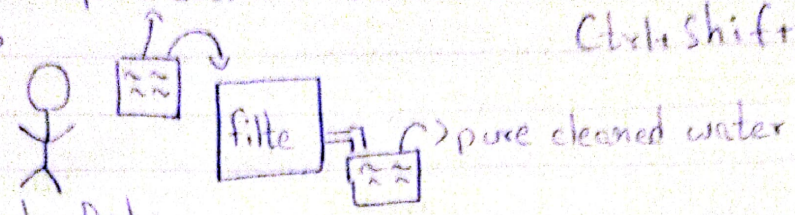

or

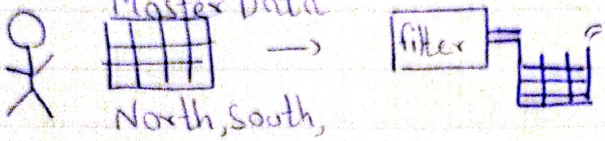

Ctrl+A or select → Hold shift and drag it using border

Select Multiple cells using Ctrl . Hold control + and click cells and Ctrl+C and paste or Ctrl+C paste using clipboard . Open clipboard copy cells it shown on clipboard and you can paste it easily

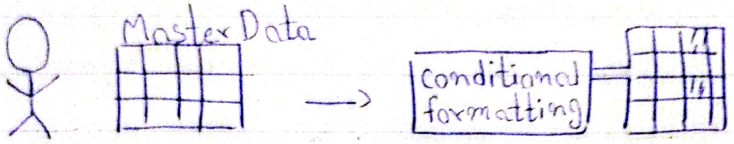

Filter → pure dust or uncleaned water

Ctrl+Shift+L

In this other data are hide on screen and you see only required data

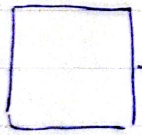

All data shown but Required North data are highlighted using Conditional formatting

Filter → Data

Filter by color

Sorting -> Arrangement

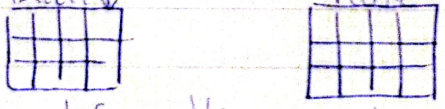

→ Number, Text, Date → A to Z, Z to A
Oldest to Newest
Newest to Oldest

Asc (smallest to largest)
Dec (largest to smallest)

- Colour Arrangement -> Similar like filter but data not hide like filter.

Data vs Table

Ctrl+T — A1 : D1 → 500

Data	Table
• Normal Formatting	• Automatic Formatting
• Not Dynamic formula	• Dynamic Formula
• No Extra Tab	• Extra Tab
• Filter, No slicer	• filter + slicer
• Cell Referencing	• No Cell Referencing
• No AutoSum	• AutoSum (Grand Total)

Table

Apply Table

First select All → Home → Format as Table → click any design

Select All → Insert → Table

Select All (Ctrl+A) → Ctrl+T → Data range → Automatically fill → My Table has header ☑ → ok

- Table has header means first raws as a header Treat if not Tick so first row not treat header. It treat data and add extra row

clear colours from all cells

Alt+H+H+N

Click Table → Table Design tab shown → Header Row is used for to show or not

- Total Row ☑ it shown botton on each column to apply filter
- First column → Bold
- last column → Bold
- Bended Row
- Bended columns

- Assign Table Name to easily access or perform operation click Table → Table Design → Top left to change name

- If raws increase on any column. And you want apply a formula on another column. It automatically icrease row and apply formula

• Insert slicer

It is advanced version of filter to filter the data and it is easy to filter data. It works same like filter

Table → Normal
Table Design → Tools → Convert To Range → ok
or Alt+J+T+G or Alt+J+T+V

• Table Disadvantage
• Formula autofill • Specific formatting • Normal range se Differences. (Table formula main [@salary] jaisi structured references use hoti haim.
No Merged cells (Create layout different.
Print or Design (Report kay liyain custom layout chahiye ha toh table adjust karna pad sakta haim. Advanced Operation (Touch operations jaise table koh normal range main convert karna extra steps mangta haim.

Fill Series → Number, Date → Month, WeekDays, Normal

• Alt+H+F+I+S
or
• Click fill in right on Home
Series in
• Row or column
• Step Type & Stop Type → ok It fill series

Number → linear, Growth

- Linear → Addition / Subtraction

1
First value

2
step value

=> 1 + 2 = 3
+ 2 = 5
+ 2 = 7
15 ← stop value

15
first value.

-3
step value

15 - 3 = 12
- 3 = 9
- 3 = 6
- 3 = 3 ← stop value

- Growth → Multiply / Divide

2
first value

2
step value

→ 2
2 * 2 = 4
4 * 2 = 8
8 * 2 = 16
16 * 2 = 32 ← stop value

10 or
0.10 → Its correct
step value
because it only Multiply so you can change number into decimal

10000
first value

10000 x 10 = 1000
100
1000 x 10 = 100
100
100 x 0.10 = 10
10 x 0.10 = 1

= Sequence (Row, column, start, step) → Enter

1 ... 121

- shortcut key of Date = Ctrl+;
- shortcut key of Time = Ctrl+: (Ctrl+Shift+;)

Drag date to downward. To Fill Dates

Date Enter using Fill series

- Type Date . unit Day
- Type Date . unit WeekDay (dont shown weekend
- Type Date . unit Month . Only Month increase Date According shown Month
  - 31-05-2026
  - 30-06-2026
  - 31-07-2026
  - 31-08-2026
  - 31-09-2026
  - 31-10-2026
  - 30-11-2026
  - 31-12-2026
  - 31-01-2027
  - 28-02-2027
  - 31-03-207

- Type Date . unit Year . Only increase year Enter step & stop value

Duplicate Fill Down → Ctrl+D
Right → Ctrl+R

path following [UP → Alt+H+F+I+U
left → Alt+H+F+I+L
