DAY M T W T F S S

DAY 10

LOGICAL FORMULAE

It is not in Excel

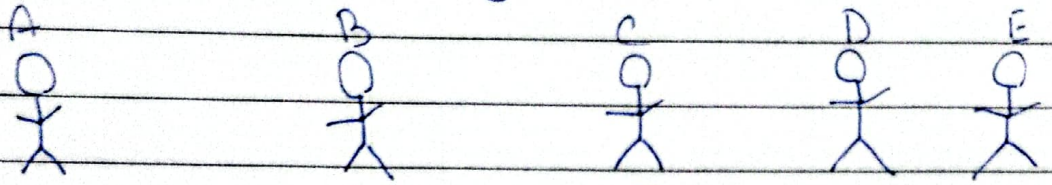

IF → By Default Answer True / false (Boolean)
↳ condition 1 / 0

Ex

→ 33% so it is pass otherwise fail
value if true
value if false

logical value

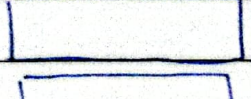

50% Pass | 30% Fail | 70% Pass | 20% Fail | 80% Pass

Step 1 :-> A's Marks
Step 2 -> Condition -> 33% ↑
Step 3 -> condition Apply
→ In there we check it - Logical value
→ logical Test (Condition Test)
Step 4 -> value if true -> "Pass" -> value if true
Step 5 -> value if false - "fail" -> value if false

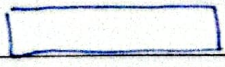

= if ('logical test', value if true, value if false')

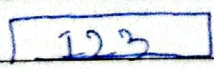

logical value + condition

2 Ex Blank → Pending Not Blank → Payment done

C33 :- 

If (C33 = "", "Pending", "Payment Done"

 → pending

 → payment Done

" " → Any text or number you write it

DATE DAY M T W T F S S

3 Ex

A = 100 If A >10 so Add So in B
B = 500 other wise B = 500 - A => 500-100

- IF (A >= 100, A+B, B-A)
- If (100 >= 100, 100+500, 500-100) => 600

AND & OR

 -> sales person -> Bonus?

Condition -> sales >= 50,000] -> Bonus other wise no Bonus
Rating >= 3

AND -> for Both Condition
OR - Any one condition

=AND (D24 >= 50000, F24 >= 3) -> True/false Same like OR

Ex

	AND	OR
A -> 30,000, Rating - 4	False	True
B -> 60,000, Rating - 5	True	True
C -> 40,000, Rating - 2	False	False

Ex RATING

- IF (D24 >= 70000, 5, IF (D24 >= 60000, 4, IF (D24 >= 50000, 3, IF (D24 >= 40000, 2, 1))))

Ex IF AND -> Nested formulae

=IF (AND (D24 >= 50000, F24 >= 3), "Bonus Eligible", "No Bonus")

Same like IF OR

IFS

If → prular → IFS

↓ ↓

Single condition Multiple conditions check

If Marks & Percentage and you can assign Grade so it use in there

Business man - Bonus → %?
Tax → calculation → which Tax → %?

=IFS(I4>=95%, "A+", I4>=90%, "A", I4>=85%, "A-", I4>=80%, "B+", I4>=75%, "B", I4>=70%, "B-", I4>=65%, "C+", I4>=60%, "C", I4>=55%, "C-", I4>=50%, "PN", TRUE, "F")

Agar True say phelay ki sari condition Tah wah F ayain gah kuo kay us nay True kardiyan

=If → Tab =IFC → Ctrl+A → Easily Write Big Formula

Switch

Switch (Expression, value, result ...)
=Switch (A1, "A+", 1000, "A", 5000

DATE

DAY M T W T F S S

IF ERROR

50 / 0 → #DIV/0 → value error

= IFERROR (E90 / F90, "Value is Wrong")

50 / 0 → value is Wrong → if errors here.

Automation sheet Trackex useful

IS BLANK, ISNUMBER, ISTEXT, ISERROR, ISNA, ISLOGICAL,

= ISEVEN (50) → True

ISFORMULA

It check & Return True / false
